PD

... because every moment is a learning opportunity

## Increase student engagement while watching a YouTube video

Pressing a number key takes you to that spot in the video.

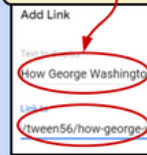

After viewing the video, pause and jump to a spot in the video. Invite students to retell what happened at that point.

## Add Links in Google Forms

NEW! Now easily add links in titles, descriptions, and questions in your Google Forms!

Position your cursor where you want the link to appear and click the link button

Add the text to display AND the URL.

Students click the the link and it opens in a new tab!

# TECH SPOTLIGHT

## Make your own GIF!

Make a GIF or have your students make them for an assignment.

**Use them to:** show steps to a problem, add humor to lessons, discussion/writing prompts, demonstrate steps

Make a selfie GIF! [andtheniwaslike.com](http://andtheniwaslike.com)

Make an animated GIF [brush.ninja](http://brush.ninja)

welcome to the CLUB

## TalkingPoints

With this free app, teachers and parents can message each other in their preferred language. Each party types in their preferred language and it is translated to the other person in their preferred language.

## TECH TERMS TO KNOW

**PLN: Professional Learning Network**

Get connected with other educators on Facebook, Pinterest, Twitter, etc...

I personally connect the most with other tech integration specialists on Twitter.
